## MLOps / ML / LLM Engineer

piotrbrodka95@gmail.com | +48607543635
github.com/brooda

## Summary

I am a MLOps / Machine Learning Engineer with a solid foundation in Software Development and Artificial Intelligence, I hold a Master of Engineering in Computer Science. I am highly skilled in Python, Machine Learning and Cloud. Currently, I am pursuing my interest in LLMs to stay at the forefront of this rapidly evolving field. I derive great pleasure from working in international environment and teaching people.

## Work experience

### MLOps / ML Engineer — 2023-06 - current

Aiconic

I've build pipeline for data processing and algorithm deployment for clinical trials.
I've build chatbots for customized client needs.

Used languages and technologies: Python, R, AWS, Kedro, GPT Api, Langchain, Streamlit

### MLOps / ML Engineer — 2022-10 - 2023-05

Algopolis.AI

I've developed an experiment management system which is used to supervise a large scale research of Deep Learning methods for algorithmic trading. I also have prepared new features in system for data management and model storage.

Used languages and technologies: Python, ClearML, Docker, PostgresSQL, SQLAlchemy

### MLOps / ML Engineer — 2020-12 - 2022-09

Noctuai

I've designed AI algorithms for sleep disorder detection. Creating pipelines for monitoring of signals quality. The main thing I've created there was an AI platform that uses created algorithm in production and is connected with other parts of a system (as a microservice), deployed to Azure.

In another project, I've been conducting Computer Vision experiments for video analytics. I also implemented MLOps tools for management of those experiments.

Used languages and technologies:
Python (with scientific and NN libraries), Microsoft Azure (Functions, Storage, DevOps), Docker, Terraform, MLflow, Airflow, Kubeflow

### Software Developer — 2018-07 - 2019-06

Microsoft

Developing a high-performance cloud data ingestion system (internal product). Creating deployment pipelines. Enhancing system security. Creating system visualization tools. Work in an international team.

Used languages and technologies:
C#, Powershell, Python, JavaScript, Microsoft Azure (App Service, Functions, KeyVault, Storage, DevOps)

## Education

### MEng — 2014-10 - 2020-09

Warsaw University of Technology

I am a Master of Engineering in Computer Science (specialization: Artificial Intelligence Methods).
Engineer thesis title: Data analysis and presentation in virtual reality,
Master thesis title: Algorithm for user verification based on keystroke dynamics

### MEng — 2019-09 - 2020-02

University of Trento

As an Erasmus+ student, I had the opportunity to expand my knowledge and expertise in Machine Learning, Computer Vision, Deep Learning, and Data Mining.

## Certificates

Machine Learning, Coursera
Deep Learning Specialization, Coursera
Generative Adversarial Networks, Coursera
Generative AI with Large Language Models, Coursera

## Publications

DECA: Deep viewpoint-Equivariant human pose estimation using Capsule Autoencoders
Authors: Nicola Garau, Niccolò Bisagno, Piotr Bródka, Nicola Conci, presented on ICCV 2021

## Skills

### Python

I have extensive experience in developing production-ready Machine Learning systems. I am proficient in using scientific and AI libraries.

### AI, ML

I have experience in broad range of Machine Learning topics, I hold a degree in AI and my current interest are LLMs.

### MLOps

I know how to develop a full ML experiment management system. Used frameworks: ClearML, MLflow, Airflow, Kubeflow.

### LLMs

I've build chabots using OpenAI Api and Langchain.

### Cloud

I have experience in deploying dockerized applications on cloud environment (mostly Azure) and PaaS ML services (Azure Machine Learning)

### GIT, DevOps, CI/CD, Docker, Kubernetes

I have experience with CI/CD systems, like Azure DevOps and Gitlab.

### SQL

PostgresSQL, SqlAlchemy, Alembic

## Declaration

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).

## Foreign languages

English - professional working proficiency
Polish - native proficiency
